OVERVIEW: Series 1 are centrifugal magnetic drive pumps, eliminating the need for a shaft seal. Pumps are serviceable with a screwdriver. See below for a breakdown of parts. Pumps are not self-priming, lack a suction lift, and thus require a **flooded suction**. Pumps **cannot be run dry** because the impeller requires the liquid being pumped for lubrication. For application assistance, contact March Pump. Motors are available in different electrical configurations such as 115V 60Hz or 230V 50/60Hz, 1 phase, and rated as continuous duty.
